

FEAR  
IN THE  
KID

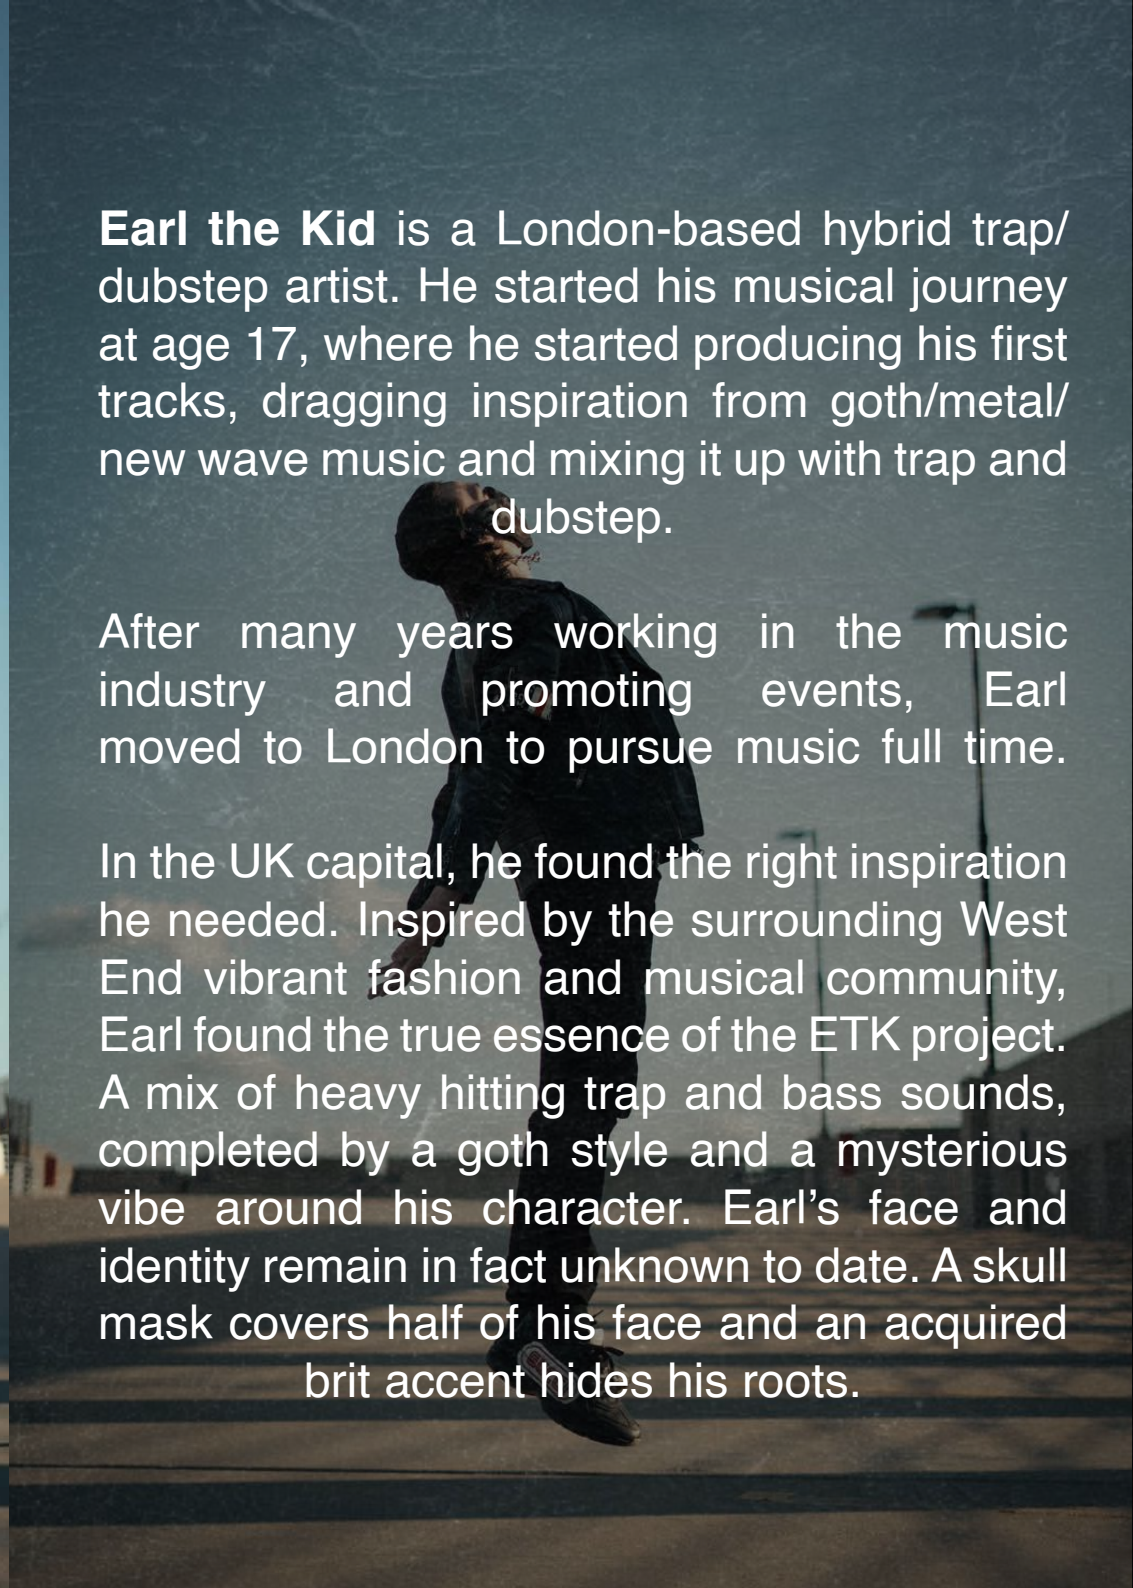

**Earl the Kid** is a London-based hybrid trap/dubstep artist. He started his musical journey at age 17, where he started producing his first tracks, dragging inspiration from goth/metal/new wave music and mixing it up with trap and dubstep.

After many years working in the music industry and promoting events, Earl moved to London to pursue music full time.

In the UK capital, he found the right inspiration he needed. Inspired by the surrounding West End vibrant fashion and musical community, Earl found the true essence of the ETK project. A mix of heavy hitting trap and bass sounds, completed by a goth style and a mysterious vibe around his character. Earl's face and identity remain in fact unknown to date. A skull mask covers half of his face and an acquired brit accent hides his roots.

# CLUB / GIGS
